Sir:

These amendments and remarks are submitted in response to the Official Office Action
mailed October 23, 2002.

AMENDMENTS

Clean version of claims, incorporating current amendments.

1. An apparatus for receiving video signals from a plurality of video cameras
wherein the apparatus comprises:
- a) a selector having a plurality of inputs wherein each input receives one of a
plurality of video signals;
 - b) a video decoder coupled to an output of the selector wherein the video
decoder receives a selected one of the plurality of video signals; and
 - c) a controller coupled to the video decoder wherein the controller conditions
the video decoder according to a parameter representative of the selected one of
the video signals.

10. An apparatus for receiving video signals from a plurality of video cameras
wherein the apparatus comprises:

- 3 a) a selector having a plurality of inputs wherein each input receives one of a
4 plurality of video signals;
5 b) a video decoder coupled to an output of the selector wherein the video
6 decoder receives a selected one of the plurality of video signals; and
7 c) a controller coupled to the video decoder wherein the controller conditions
8 the video decoder according to a plurality of parameters representative of the
9 selected one of the video signals.

1 26. A method of receiving video signals from a plurality of video cameras wherein
2 the method comprises steps of:

- 3 a) selecting one of the plurality of video cameras for providing a video signal
4 to a video decoder;
5 b) retrieving a parameter representative of the video signal from a memory
6 store; and
7 c) conditioning the video decoder according to the parameter.

1 32. The method according to claim 31 wherein the step of forming a predicted value
2 for the parameter comprises steps of:

- 3 a) calculating a difference between prior value obtained for the parameter
4 and a current value obtained for the parameter; and
5 b) combining the difference with the current value.
